DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7 and 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Harshfield (U.S. 6,420,725 B1).

Regarding claim 7, Harshfield discloses an apparatus comprising an electrical contact (42) on a substrate (60); a dielectric (50) on (i.e. touching which is “on”) the contact (42), the dielectric (50) having an opening (52) exposing the contact (i.e. the top surface of the contact), wherein the dimensions of the opening (52) expose a first contact area of the contact (i.e. the entire top surface of the contact 42), the apparatus further comprises a spacer (44) within the opening (52) on the contact (42), the spacer (44) exposing a second area of the contact having dimensions less the first contact area (per title visible in cover figure) and a conductor electrically coupled to the programmable material (e.g. 62).

Regarding claim 9, Harshfield discloses a diffusion “barrier material” as beneficial for chalcogenide (col. 5, lines 5-6).

Regarding claim 10, Harshfield discloses a signal line in electrical contact with the contact and an isolation device between the contact and the signal line (col. 3, line 34).

Regarding claim 12, Harshfield discloses that the programmable material includes chalcogenide (col. 4, line 56).

Allowable Subject Matter

3. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: Applicant's claimed apparatus can be distinguished from the apparatus disclosed by Harshfield in that both an aperture in a dielectric and at least part of the dielectric having the aperture are both "over" the contact since Harshfield's apparatus only has the aperture over the contact, but not the dielectric having the aperture.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan Pert whose telephone number is 703-306-5689. The examiner can normally be reached on M-F (7:30AM-3:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 703-308-1233. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.
